EQUIPMENT:

1. 05 Int'l. Water Truck: Had lots of white smoke coming out of exhaust. Possible head gasket or EGR cooler problem. Took oil sample to check if any coolant contamination in motor oil. Sample came back with minimal amount, at 0.12% glycol. EGR cooler was leaking coolant into exhaust. R&R EGR Cooler and all hoses to cooler. Also R&R thermostat and drained and filled with new motor oil. So far runs OK. Weld crack in water tank.
